

I. Byce

170 Waterview Road, Snake River

Planting plan created by Muskrat Watershed Council

Survey Date: 07/21/2020 • Planting Date: 10/26/2020

Schedule A:

Plants & Property

Land Characteristics

This planting plan is designed based on the land characteristics identified during the day of the site visit. Plants are chosen according to the soil and light conditions on your property. The number of plants chosen for each planting compartment takes into account the square metre area of the space, as well as the amount of current vegetation cover.

Your property is part of ecoZone: 4a

Land Characteristics by Compartment

	Length	Width	Area	pH	Soil	Moisture	Light	Height
A	115.6m	3m	346.8m ²					
B	39.19m	3m	117.6m ²					
	154.79m	3m	464.4m ²					

Plant Selection Summary

The following shrubs and trees are chosen for their suitability and survivability given the current soil and light conditions in each compartment on your property, as well as preferable features.

Plant Species	A	B	Potted	Bareroot	Wildflower
White Birch	200			200	
Red Osier Dogwood	200	50		250	
Smooth Arrowwood	250			250	
Silver Maple	250			250	
Highbush Cranberry		50		50	
Subtotal	900	100	0	1000	0
Totals	1000				

Plant Information

The following table summarizes key information about each plant selected for your property.

White Birch

Height: 15-25m

The Paper Birch is a medium-sized, deciduous tree which may also be referred to as White Birch or Canoe Birch. This species produces a sparse, irregular crown which arises from a slender trunk. This tree is best known for distinctive white, horizontally flaking bark, from which its name is derived. The Paper Birch produces light green, egg-shaped, 5-10 cm long leaves alternately arranged. During the fall, the light green foliage turns a bright yellow colour. During the spring, catkins appear and produce winged seed keys which mature and drop between the fall and following spring.

Red Osier Dogwood

Height: 1.5-4m

The Red Osier Dogwood is a medium-sized, deciduous shrub native throughout Northern and Western North America. This species is multi-stemmed with numerous erect and ascending bright red branches that create a loose and spreading form. Leaves produced are simple, two-toned with a dark green upper side and light green underside. They are arranged opposite each other along the branches. During the fall, the foliage turns a brilliant red to dark purple. Clusters of small, creamy white flowers form on the terminal ends of the branches between June and July. The Red Osier Dogwood produces blueish-white fruiting bodies during late summer, which may persist throughout the winter. This shrub's berries provide an important winter food source for numerous species, from large deer to small wintering birds.

Smooth Arrowwood

Height: 1-5 m

The Smooth Arrowwood is a medium sized, deciduous shrub that grows from 1-5 m tall. The leaves are simple, oppositely arranged, and have coarsely toothed margins. In the spring and summer, the leaves have a dark green and glossy color. Fall colors can vary between yellow, red, or reddish purple and change in the late autumn. The flowers are showy, creamy white colored, appear in small, flat clusters, and bloom from late May to June. Berries are small, dark blue to black in color, and develop from August to November. This shrub also has gray bark and slender stems. Smooth Arrowwood is an attractive species and an excellent food source for many bird species. It is easy to transport, plant, and grow so could be used for mass planting. The shrub can be propagated from seeds or cuttings for expanding in the area or for future use at different sites. Growing Smooth Arrowwood is low maintenance but occasional pruning may be beneficial for shaping.

Silver Maple

Height: 30m

The Silver Maple is a fast growing, deciduous Maple tree famous for its majestic, mature form. This species has a broad, round crown that sits on top of a tall straight trunk. Its ascending branches give this tree a full, bushy appearance. Silver Maple leaves can be differentiated from other Maple leaves due to the deep notches on their lobes. It has a silvery white colour on its underside in contrast to bright, light green topside. During the fall, the leaves on the Silver Maple turn a reddish orange to bright golden yellow. Between late April and May, inconspicuous, small greenish red flowers bloom and by June turn to yellowish-green or brownish pairs of winged keys. The Silver Maple's shallow, spreading root system and ability to withstand flood and drought make it an excellent tree to utilize for erosion control and shoreline stabilization.

Highbush Cranberry

Height: 3 m

Highbush Cranberry is a large deciduous shrub species that typically grows about 3 m in height. The branches on this shrub are dense with arching stems, creating a full form. The leaves are oppositely arranged, Maple leaf shaped, have 3 lobes, and have entire or toothed margins. The flowers are showy, creamy white coloured, appear in flat clusters with larger florets surrounding smaller ones, and bloom between May and June. These flowers change into drooping, bright red berry clusters that persist throughout the winter. While the berries are edible to humans, they are very tart when consumed raw so are typically cooked first. This shrub has very attractive fall foliage, changing a reddish purple colour. The flowers are beneficial to pollinator species, like bees and butterflies. The fruit is beneficial to wildlife species, including birds and small mammals. The root system is extensive, making this shrub valuable for controlling erosion and stabilizing loose soil. This species can be found across Canada from Newfoundland to British Columbia, but is most commonly found in Ontario and Quebec.

Financial Summary

Project Partners: Watersheds Canada and Muskrat Watershed Council

The following section outlines the total cost of your project. It has been divided into 2 sections; 1- Plants and Material, 2- Services. It also includes the breakdown of the landowner contribution and the portion that will be paid by Watersheds Canada, as outlined in the Project Costs Total table.

The Natural Edge program has received generous funding to help support the costs of plants, materials, and project coordination and delivery, making this program possible.

Bareroot stock

Item	Quantity	Cost/Item	Subtotal
White Birch	200	\$2.25	\$450.00
Red Osier Dogwood	250	\$2.25	\$562.50
Smooth Arrowwood	250	\$2.25	\$562.50
Silver Maple	250	\$2.25	\$562.50
Highbush Cranberry	50	\$2.25	\$112.50
Total Bareroot plant stock	1000		\$2,250.00

Tending materials

Item	Quantity	Cost/Item	Subtotal
Mulch	1000	\$1.00	\$1,000.00
Tree guards (deciduous only)	450	\$1.50	\$675.00
Total Tending materials			\$1,675.00

Totals

1-Plants and materials	
Bareroot plant stock	\$2,250.00
Wildflower plant stock	\$0.00
Tending materials	\$1,675.00
Plants & Materials	\$3,925.00

2-Services	Quantity	Cost/Item	Subtotal
Watersheds Canada's Site visit (<i>Site visit in-kind</i>)	1 on 07/21/2020	\$0.00	\$0.00
Plant stocking	1000	\$2.00	\$2,000.00
Mulching & tree guard installation	1000	\$1.50	\$1,500.00
Shipping & handling of materials			\$25.00
Planting plan			\$350.00
Project management and delivery			\$400.00
Administration fee			\$100.00
Services total			\$4,375.00
Total Project Costs			Subtotal
Total project value (including in kind contributions)			\$7,475.00
Total eligible costs (<i>excluding in kind contributions</i>)			\$8,300.00
Muskrat Watershed Council's contribution (<i>100% of eligible costs</i>)			\$8,300.00
Landowner contribution (<i>0% of eligible costs</i>)			\$0.00

Schedule C

Project Agreement

Stewardship Agreement

Please indicate your agreement to this proposed plan by signing the following Stewardship Agreement and submitting it, along with your financial contribution, to:

Watersheds Canada

115-40 Sunset Blvd. Perth, ON, K7H 2Y4

Plant Availability

Please note that plant species may need to be changed based on plant stock availability at the time of ordering.

Project Completion

Upon receiving your signed stewardship agreement and financial contribution, a date will be booked to complete the project. Watersheds Canada will supply all plants, materials, and planting labour. If there are particular dates that you would prefer, we will do our best to accommodate your requests.

The Natural Edge Stewardship Agreement with Watersheds Canada

Agreement made this Day of the Month of in the Year .

BETWEEN Ian Byce, 170 Waterview Road, Ontario, K0J1K0
(Hereinafter called the OWNERS)

AND Watersheds Canada, 115-40 Sunset Blvd, Perth, ON, K7H
2Y4 (Hereinafter called WC)

WHEREAS the Owners and WC have met and discussed plans for shoreline naturalization on the specified area(s) in Schedule A existing on the Owners' land;

WHEREAS the Owners indicate approval of the project as proposed; and

WHEREAS the project is, or will be for the benefit of the Owners and others;

1. This Agreement shall be in effect for a period of 5 years, commencing with the date of this Agreement.
2. The Owners and WC agree that the areas where the work is to be performed is as described in Schedule A.
3. The Owners grant WC, its contractors, employees and agents, the right to enter the property to perform the work agreed upon as outlined in Schedule A. In addition, WC, its contractors, employees and agents may inspect the work performed for the purposes of monitoring the project and survival assessment, with prior agreement with Owners for date and time of inspection.
4. The Owners agree to contribute the "Landowner contribution (0% of eligible costs)" and pay the costs indicated in Schedule B.
5. In instances where the Owners are to pay WC for work to be performed (outlined in Schedule A), the Owners agree to provide payments to WC prior to the commencement of that operation. Failure of payment shall constitute a breach of this Agreement and the Owners agree this Agreement will be terminated and thereupon the Owners agree to pay WC the estimated costs of the operations of the project completed, if any.
6. The Owners agree, if necessary, to perform a reasonable amount of maintenance, which is described in the Native Plant Care Guide, available at watersheds.ca.
7. If the contractor is required to perform the work outlined in Schedule A, then the contractor carrying out the work on the land described will be required to take out and furnish evidence of a comprehensive policy of public liability and property damage coverage. The contractor and their workers will be required to be in good standing with the Workplace Safety and Insurance Board prior to performing the work.
8. The Owners agree not to remove, destroy or alter the project without prior consultation and approval of WC. Pruning and trimming planted nursery stock, or adding replacement native nursery stock is exempt.
9. The Owners agree not to mow the planted area.
10. The Owners do acknowledge that WC, its contractors, employees and agents, having performed said works, are not under further obligation with respect to survival of nursery stock, inspection, or maintenance.
11. The Owners, in the absence of negligence, hereby remises, releases and forever discharges WC, its contractors, employees and agents from all claims and demands for injuries, including death, loss, damages and costs in any way related to or connected with installation and maintenance of the work described or resulting from any deleterious effects of the work to the land or to the lands and buildings thereon retained by the Owners.

About this program

This project is created as a co-partnership between
Watersheds Canada and Muskrat Watershed Council

About Muskrat Watershed Council

We are a volunteer, community-based, not-for-profit organization with the goal of improving water quality in the Muskrat Lake Watershed by using scientific and local based knowledge. We seek to engage and empower people and communities by promoting best management practices in an effort to identify and reduce nutrient loading from all sources in the Watershed. Through these objectives, we hope to foster economic, societal and environmental sustainability.

This program was created by Watersheds Canada

We believe that every person has the right to access clean and healthy lakes and rivers in Canada. At Watersheds Canada, we work to keep these precious places naturally clean and healthy for people and wildlife to continue using for years to come. We love working with others to meet the needs of local communities, whether you're a concerned citizen, a landowner, a lake association looking for help, or a coalition of groups interested in activating your local community.
